

BOY SMARTS

OFFERS INSIGHTS FOR TEACHING BOYS

Barry MacDonald thinks boys are often misunderstood in our homes and schools...

February 2006, ***Student Success***
Craig Spence, School District #35

Boys will be boys, and that's something to celebrate says Barry MacDonald, author of *Boy Smarts: Mentoring Boys for Success at School*, which focuses on the differences between boys and girls and offers dozens of strategies for helping boys succeed in the classroom and at home.

From the outset, Barry makes it clear he is not subscribing to the notion that girls are succeeding in school at the expense of boys.

The objective, he reminds, is to continue mentoring girls to success while acknowledging the different learning styles of girls and boys and teaching to both.

At all costs, he says, we must avoid "stereotyping". There may be a tendency for girls to be more inclusive and to be better able to multi-task; there may be a tendency for boys to be more boisterous and aggressive, and to demonstrate better spatial thinking skills; but it's a mistake to assume that all girls and all boys are locked within stereotypes - there is a huge overlap between the thinking patterns of boys and girls, making gender a "spectrum" that everyone fits into in a unique way.

“Boys learn best when they are free to make mistakes without fear of being humiliated,”
Barry says.

Bravado and edginess in boys are not always what they seem, Barry cautions, and adults have to be careful not to misread some of the cues. Insisting that boys straighten up, stop fidgeting, and look you in the eye is often not the best thing to do.

A sampling of suggestions from *Boy Smarts* include:

Use brief discussions rather than lecture to help boys achieve insights;

Encourage peer mentoring between boys;

Give boys room to move. Movement, like fidgeting and shifting weight from foot to foot, helps boys focus and process thoughts;

Use humour or the unexpected to capture boys' attention;

Encourage risk taking.

“Boys learn best when they are free to make mistakes without fear of being humiliated,” Barry says. “Criticism, especially in a group setting, challenges a boys status within the group and invites behaviour or attitudes such as a show of anger or indifference... When boys are afraid, learning stops in its tracks.”
